Velora Aero X2 - Product Specification

Overview

The Aero X2 is Velora's lightweight urban e-bike, designed for daily commuting and weekend rides. It launched in January 2026 and replaces the Aero X1.

Motor

The Aero X2 uses a 250 W mid-drive motor with 80 Nm of peak torque. Pedal assistance is provided up to 25 km/h, in line with EU regulations. Four assist modes are available: Eco, Tour, Sport and Turbo.

Battery

The integrated battery has a capacity of 540 Wh and can be removed with a key for charging indoors. With the included 4 A charger, a full charge from empty takes 4.5 hours; charging from empty to 80% takes 2.5 hours.

Range

Range is up to 95 km in Eco mode, about 70 km in Tour mode and about 45 km in Turbo mode, measured with a 75 kg rider on flat terrain at 20 degrees C. Cold weather, hills and headwind reduce range.

Velora Aero X2 - Frame, Weight and Pricing

Frame and weight

The frame is made of hydroformed 6061 aluminium. The complete bike weighs 21.4 kg including the battery. The maximum permitted total weight (rider plus luggage) is 120 kg. The rear rack carries up to 25 kg.

Weather resistance

The motor, battery and display are rated IPX5: they are protected against water jets and riding in heavy rain, but must not be submerged or cleaned with a pressure washer.

Sizes and colours

Available in frame sizes S, M and L, and in three colours: Graphite, Fjord Blue and Sand.

Price

The recommended retail price is EUR 3,290 including VAT in the Netherlands. Prices in other countries may differ.
